Introduction to WI-FI Functions

This system is equipped with Wi-Fi technology that allows a user to control the system remotely. In order to use this feature, the system must be connected to the internet through a local router and modem. The correct APP must also be downloaded and installed on a mobile device.

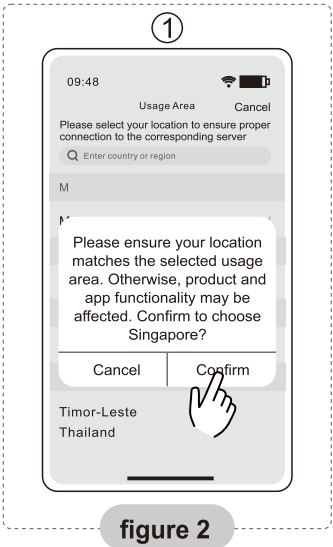

Download the App

1. Smartphones are currently compatible only with Android 7.0 or later, and iOS12.0 or newer systems.
2. You can search for "ShinFlow Home" on Google Play Store for Android devices or the App Store for iOS devices to download and install the application.
3. For mobile devices (currently supporting only Android and iOS operating systems), use a third-party scanning tool to scan the "QR code", which will automatically redirect you to the ShinFlow Home download page, where you can download and install the application.

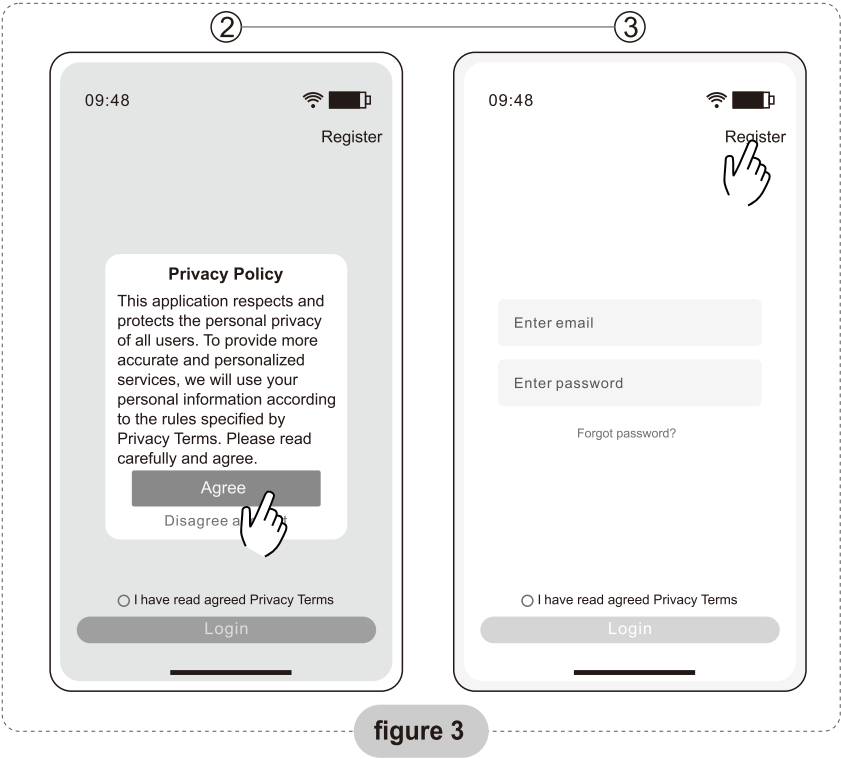

Sign Up, Log In, and Account Cancellation

1. When the app is installed, you need to first select your region upon entering the app.

Sign Up, Log In, and Account Cancellation

- 2.Click the "Agree" button (a privacy pop-up appears during the first login).
If you already have an account, enter your credentials to log in directly.

- 3.Click "Register" to start creating your account.
- 4.Please read and agree to the User Privacy and Service Terms before registering.
- 5.Enter your email to register an account

Add Device

- 1.Click the "Add Device" button.
- 2.Select the device category.

Add Device

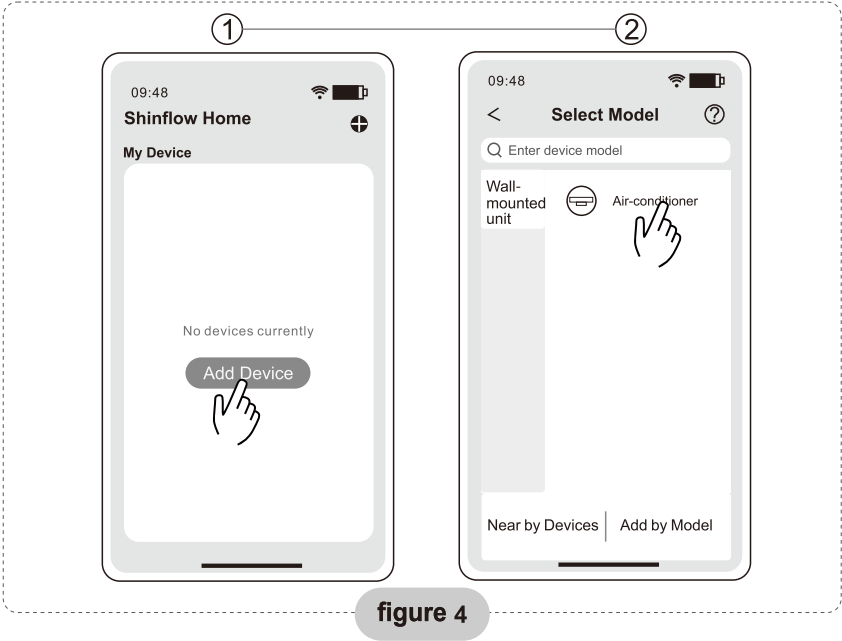

figure 4

- 3.Enter Wi-Fi information. Click the "Next Step" .
- 4.After powering on the device, perform a device reset (refer to the smart phone reset instructions).

- Please press the **HEALTH** and  buttons simultaneously for 3 seconds. Ten beeps from the air conditioner indicate that the Wi-Fi reset was successful.

Note:

- (1).The handheld controls shown below are just a few of the different types of controls available. Please rely on the handheld controller that came with your unit as many of the operations are the same.
- (2).If the device is still not connected successfully, please attempt another reset of the air conditioner Wi-Fi® as described above.

Add Device

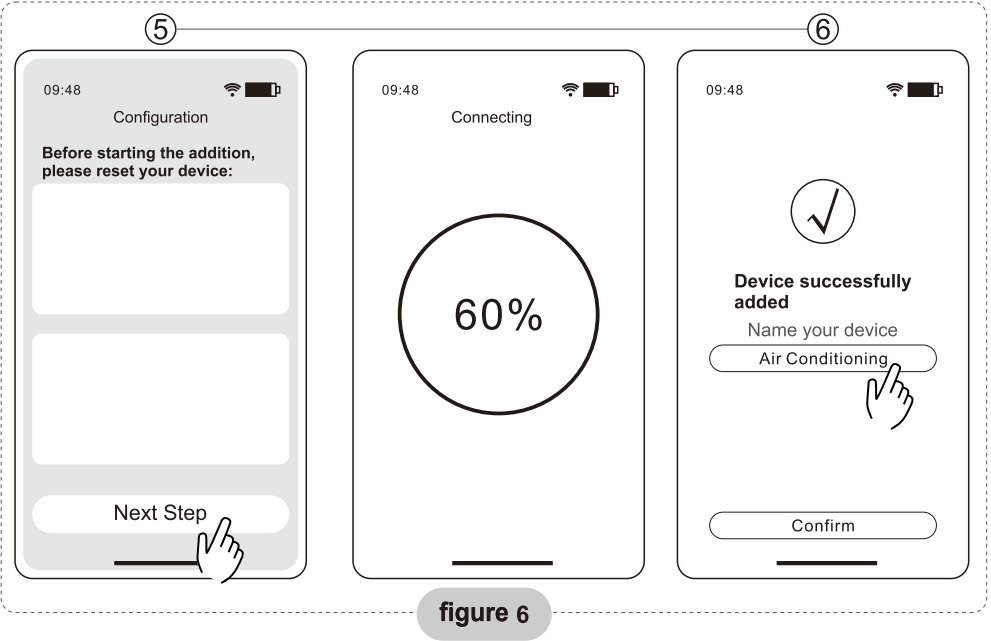

figure 6

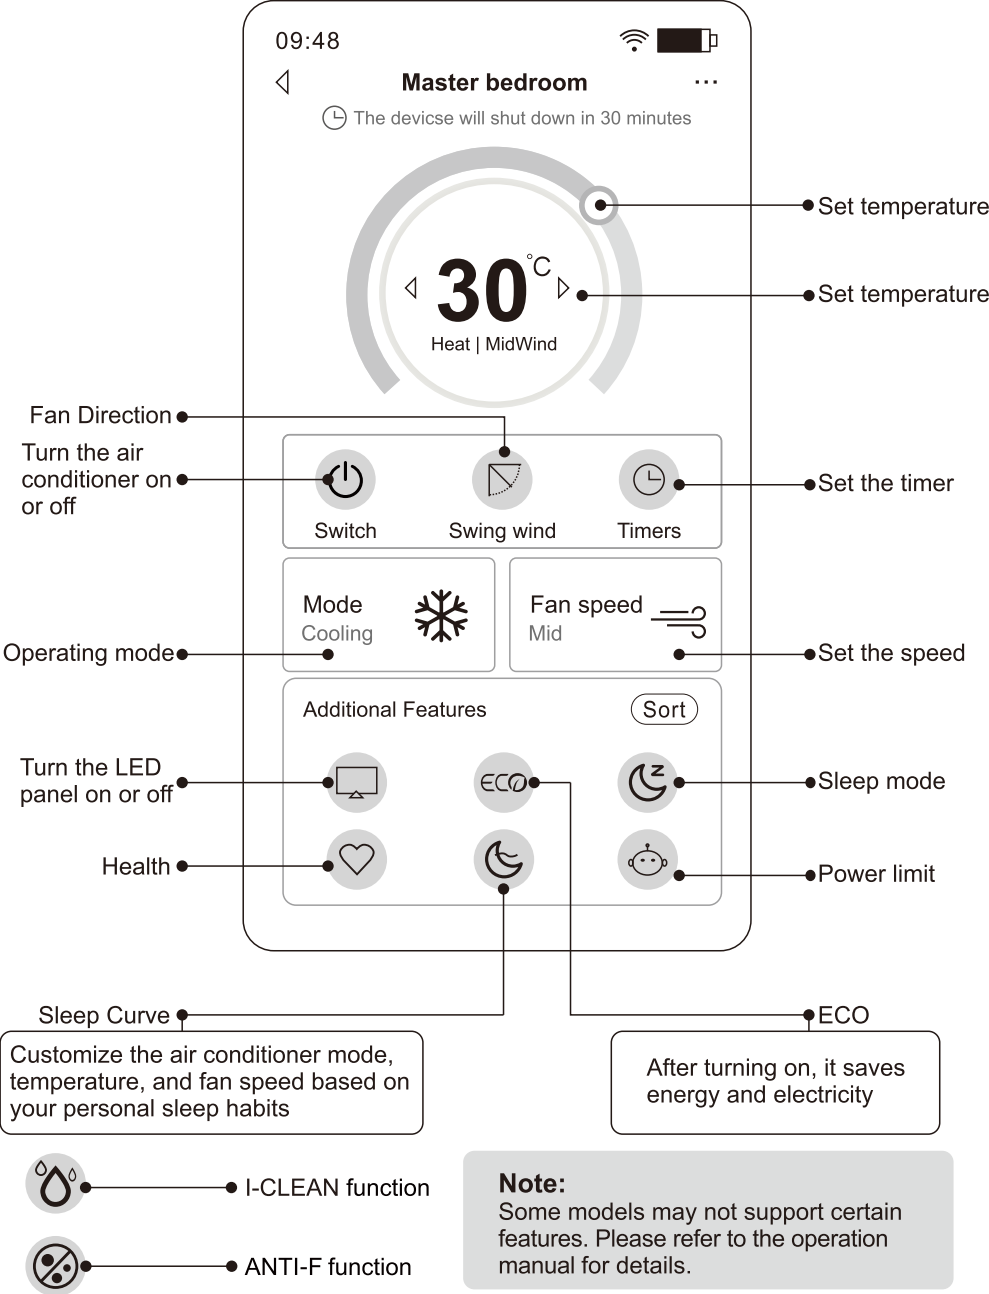

- 5.Click "Next Step" to start connecting.
- 6.Device successfully added. Enter a name for the air conditioner.

Notice

- 1.Ensure your device is powered on.
- 2.When connecting, keep your phone close to the air conditioner.
- 3.Connect your phone to your home Wi-Fi network.
- 3.Enable the 2.4GHz wireless network on your router. If unsure whether your router supports 2.4GHz, please contact the manufacturer.
- 4.It's recommended to use a Wi-Fi network name containing only letters and numbers. If your network name includes special characters, please modify it in your router settings.
- 5.If you cannot retrieve Wi-Fi information, please check if you have granted the app the necessary permissions.
- 6.Scan the QR code to access more information about the app's features.
